

## PRIMARY FOUNDRY ALLOY

In consistent focus towards value addition, Vedanta supplies primary alloys to various industrial segments. The casting facility comprises of state-of-the-art Remetal Befesa make, Spain equipped with associated in-line metal treatment facilities consisting of Degassing & Metal Filtration Unit and Vertical Chill Casting Technology.

In-house laboratory is equipped with spectrometers & other allied inspecting facilities to ensure that all products meet the specified chemical, physical, surface & static quality requirements

Type	Description
Ingot variants	10kg, 22kg, T ingot
Alloys variant	Alsi7Mg, Alsi11, Alsi3
Inner Diameter	10kg-730mm*105mm*73mm, 700mm*700mm*944mm 22kg-740mm*170mm*114mm T ingot-845mm*410mm*Length customized.
Pieces/Bundle	44 pieces for 22 kg bundle, 95 pieces for 10 kg bundle, Single piece for T Ingot
Packing	In bundles - PET Straps / Cross Straps / Forklift supporting. Options for customised packaging available.
Identification	(Colour Strip Painting)on each ingot bundle
