

## FLIP COILS

Vedanta also produces flip coils used by the steel manufacturing units for de-oxidizing of molten steel as alloying element for manufacturing special steel.

Key features include ergonomic design, fine finish and dimensional accuracy.

Type	Description
Rod diameter	9.5mm, 12mm, 13mm, 15mm
Inner Diameter & Tolerance	550mm +/- 10 mm
External Diameter	1100-1400mm
Weight per coil	1 - 2 MT
Packing	Packed in flipping cage and mounted on wooden / mild steel pallet and Strapped with pallet horizontally or vertically. All coils are wrapped in stretch film and palletized.
Identification	Colour coded and affixed with a detailed sticker
Alloy variants	1xxx
